

I have several items that I wondered would be of interest to photography club members.

First I have a series of about 10 vintage Castle Films 8mm films with titles such as the Pincushion Man, Americas wonderland etc. They appear to be shorts from the 30s and 40s. Not sure if there are any collectors in the club that would find these of interest.

I also have a variety of old cameras and camera equipment including polaroid cameras (not sure whether they are operable). I would like to get rid of them but would prefer not to just throw them away.
